

a new perspective on FLIS

Ninja is a search tool for technical data related to parts & products purchased by the federal government. Get NSN-based data in a clean graphic format with unique additional features and tooltip context help for industry codes and abbreviations.

TOP REASONS TO JOIN

EXPORT EASILY.

Unlimited data exports in spreadsheet-ready .csv format. Download search results and detailed NSN data. The powerful export feature is a core Ninja strength.

GROUP LICENSING.

Buy multiple subscriptions at once. You will get a group license code to share with your team. Every user will have their own Ninja account and login information.

FLEXIBLE ACCESS.

Ninja works well on all devices – desktop computers, tablets and phones. There is no software to install, just use your web browser and internet connection.

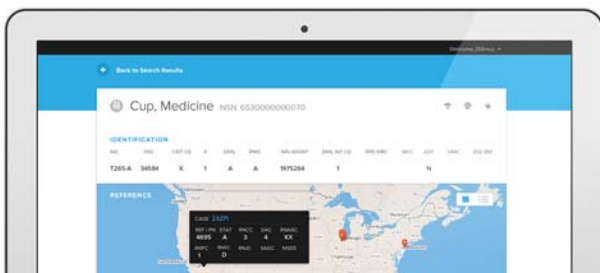

SAVE TIME.

Fast free text search for FLIS data. Research NSN, CAGE, part number data & more. Ninja adds maps and graphs to help you find the information faster.

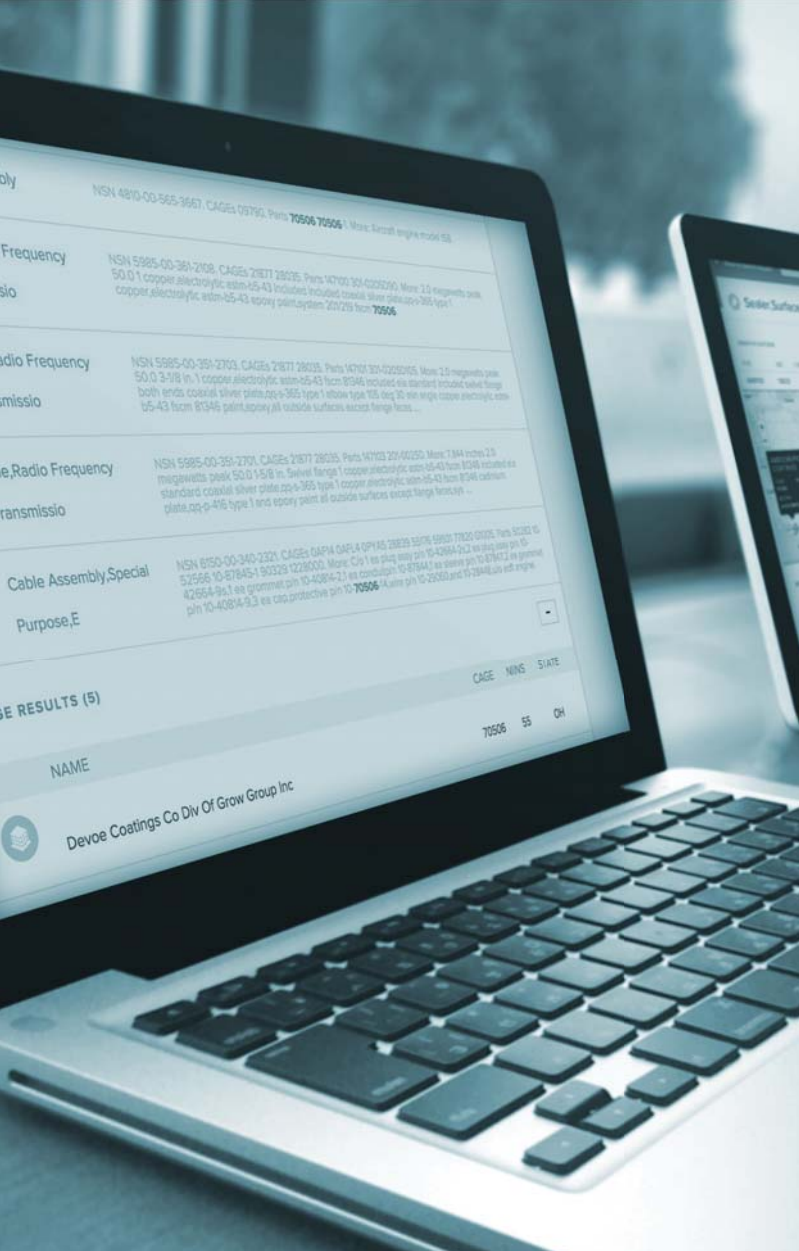

LATEST UPDATES.

Ninja gets the most current data provided to public by the Defense Department each month. View past twelve months of price history and FLIS code changes.

ABOUT US:

Ninja is brought to you by Vital Axiom. Our team has 20+ years of Government Data experience, including production of FED LOG, the leading DLA logistics software. Niinja is a private product, not affiliated with the U.S. Government. We use FOIA-released datasets and we do not alter the data.

NIINJA FEATURES:

To check out screenshots of Niinja and get a sneak peek at Niinja's features, scan the QR code below!
